DETAILED ACTION

Election/Restrictions

Newly submitted claims 21 and 23-28 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the layer of filter paper is not required to have a size and shape to fit over and adjacent a top of a permanent filter. The subcombination has separate utility such as with a coffee maker not requiring a spout for delivering heated water.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21 and 23-28 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicant's election with traverse of claims 1-8, 10-12 and 14-20 in the reply filed on January 27, 2003 is acknowledged. The traversal is on the ground(s) that the claims as now amended are not restrictable. This is not found persuasive because of the new grounds of restriction listed above.

The requirement is still deemed proper and is therefore made FINAL.

Reissue Applications

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Specification

The amendment filed September 9, 2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the change from "metallic" to "permanent" (patented claims 4 and 7 do not provide support); the insertion of "permanent filter" at column 2, line 30 and column 3, line 41; changing "etc" to "and the like" at column 1, line 62; "rid" to "reduce" at column 2, line 26; inserting "generally designated 9" at column 3, line 34; and the recitation of "elevated" pressure as opposed to the original "3 to 15 bars".

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

Claims 1-8, 10-12 and 14-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The recitation in claims

1 and 17 of a "permanent filter" and the recitation of an "elevated" pressure in claims 4, 7 and 17 is considered new matter not having support in the specification.

The presence of the term "permanent" in patented claims 4 and 7 does not provide adequate support for its addition to the specification and claims. A review of paper #11 (interview summary) in patent application 08/977,997 gives a clear indication that entry of the term "permanent" in patented claims 4 and 7 was by error. The specification at no location provides support for having a permanent filter.

The language found at column 3, lines 36 and 37 of the patented application, the water is delivered "under pressure" is not sufficient support for changing the pressure range from "3 to 15 bars" to "elevated". Nor does it provide support for having an "elevated pressure".
